

THE BENEFITS OF PRO CHARGE

Pro Charge is a revolutionary new product that changes the way additives can be introduced into HVAC equipment.

Each can contains roughly 2 pounds of refrigerant pre-blended with our UV Dye & Sealant and will service systems up to 6 tons.

The refrigerant in each can is the perfect amount to top off equipment with seasonal leaks.

Our UV Dye & Sealant is an oil based Non-Polymer blend that does not chemically react with air or moisture, so it only activates at the source of the leak and nowhere else!

This product is also non-flammable and is safe for technician's tools!

"It's as easy as charging HVAC equipment with refrigerant!"

- ✓ Saves Time and Money
- ✓ Easily Identifies Leaks
- ✓ True Non-Polymer Sealant
- ✓ The Refrigerant Gets Equipment Running
